Durban Action Global Scenarios for 2°C: feasibility, implications and impacts

COP Side event at the EU PAVILLON Brussels Room, 1st Floor – Zone D2

This event will provide an assessment of the global emissions reductions strategies and new insights about the impacts in Europe and in other vulnerable regions of the world. The event will present the latest results from a model comparison exercise which has assessed the implications of a set of international climate policy scenarios in terms of feasibility of achieving 2°C and in terms of implementation requirements.

Within this seminar the latest research from two EU FP7 funded research projects, **IMPACT2C** and **LIMITS** will be discussed.

Speakers:

Elmar Kriegler *Potsdam Institute for Climate Impact Research (PIK)*

Massimo Tavoni *Fondazione Eni Enrico Mattei (FEEM)*

Robert Vautard *Centre National de la Recherche Scientifique (CNRS-IPSL)*

Paul Watkiss *Paul Watkiss Associates (PWA)*

Introduction: Serena Pontoglio, **European Commission, DG
Research & Innovation**
